Tickers with Splits

¥327213.9

Avg Dividend / Event

25:1

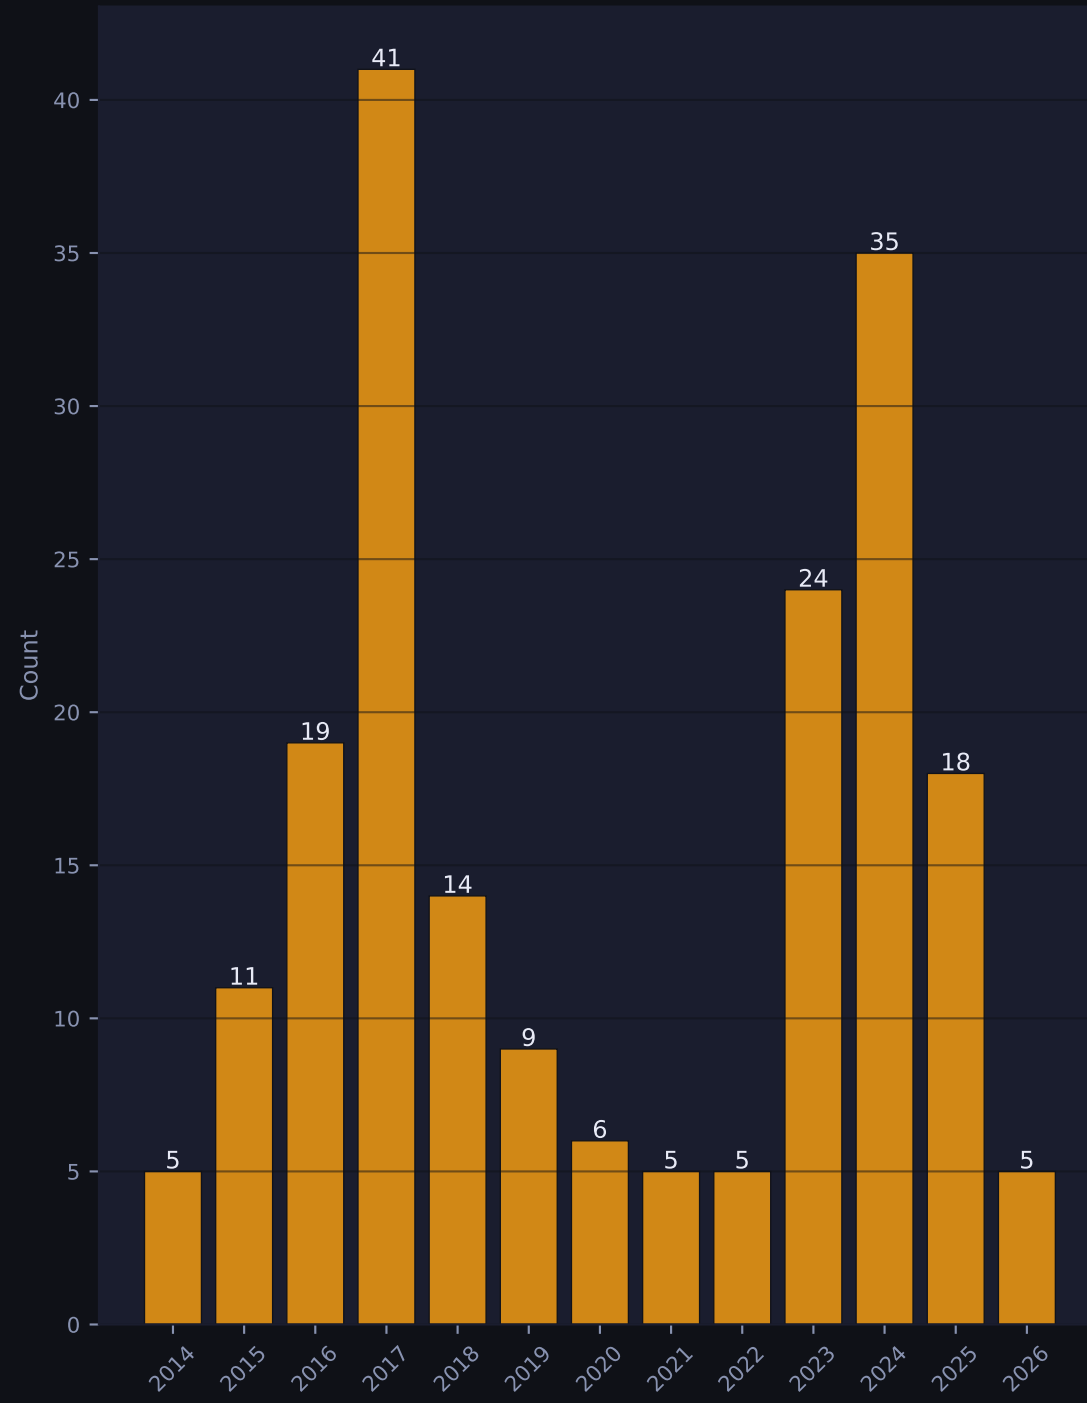

Largest Split Ratio

Note on price adjustment: All OHLCV data in the feature panel was downloaded with `auto_adjust=True`. This means historical prices are backward-adjusted for every dividend and split below — returns, volatilities, and all derived features are computed on total-return adjusted prices. Dividends are baked into price continuity; splits do not cause artificial return spikes.

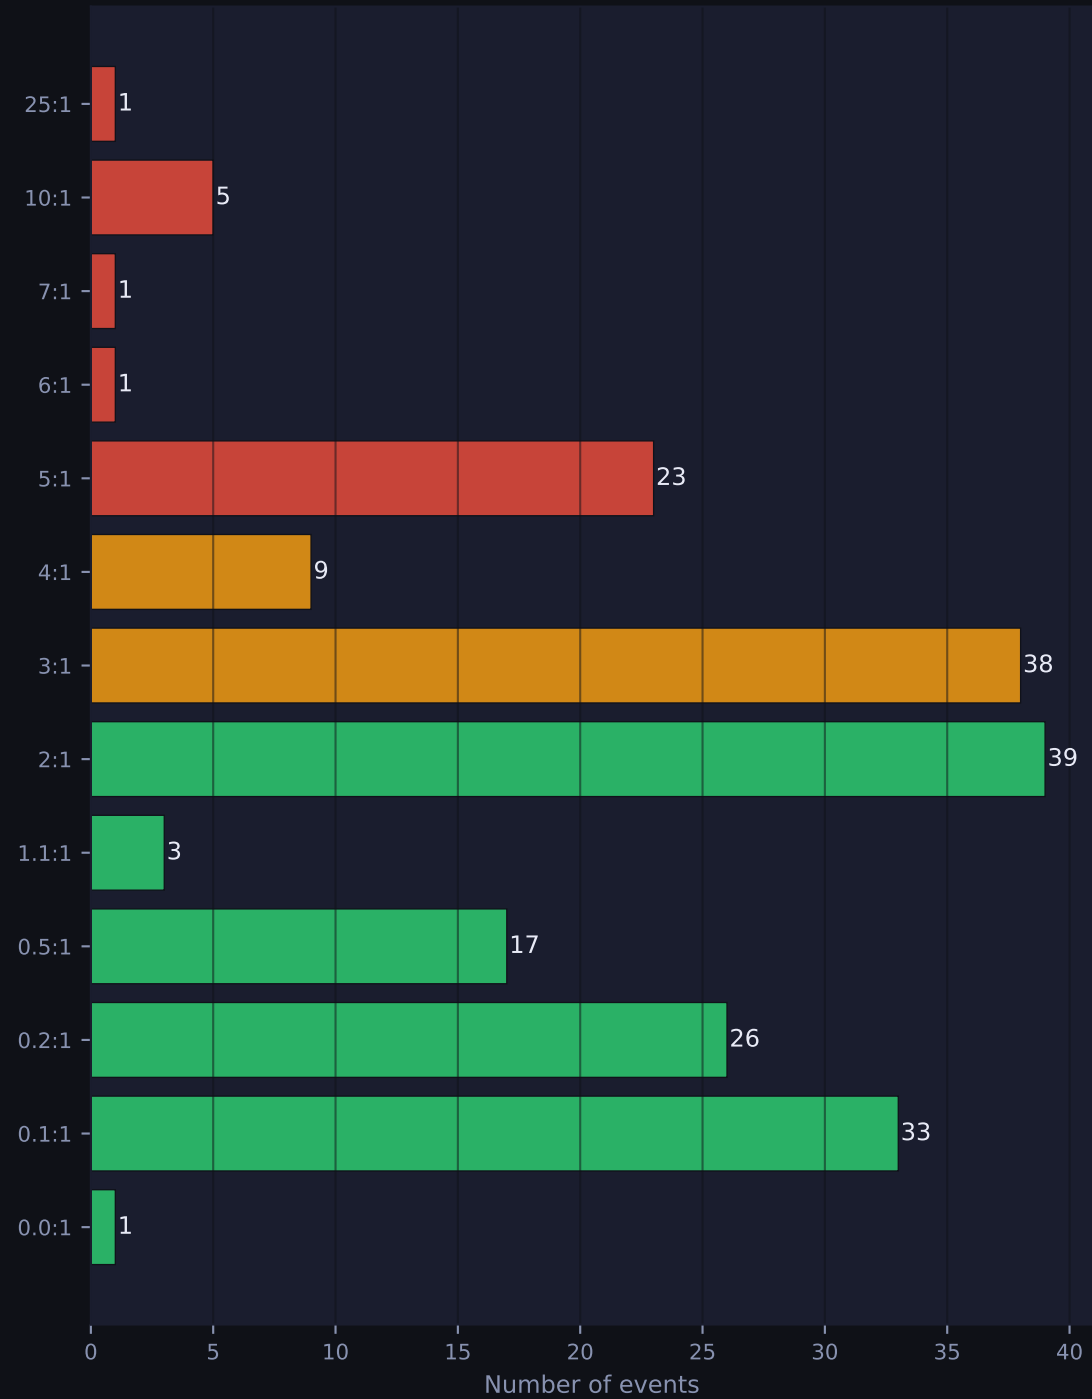

Date	Code	Company	Ratio
