TSE Market Restructure — April 4, 2022

Japan's largest exchange overhaul in decades

- Prime Market — large-cap companies meeting global investor standards
 - Standard Market — companies meeting standard governance criteria
- Growth Market — high-growth companies with lower listing requirements

All NKY 225 constituents moved to the Prime Market. This had no direct effect on prices or the NKY 225 weighting — the index was not reconstituted as a result. However, companies on the Prime Market face stricter requirements around English-language disclosure, independent directors, and cross-shareholding reduction, which has driven the wave of corporate governance improvements (higher dividends, buybacks, stock splits) observed from 2022–2025.

Impact on features: No price discontinuity — `auto_adjust=True` handles this seamlessly. The restructure is captured as a calendar event in the features via calendar flags (month/year). The governance reform it triggered is a key driver of the split wave and dividend growth visible in the corporate actions data.
